Issue 01/2021

A close-up photograph of a lit sparkler against a bright green background. The sparkler's thin metal stem extends from the bottom center towards the middle of the frame. At the top of the stem, a small red fuse is lit, creating a bright yellow and orange flame. From this point, a dense cloud of fine, golden sparks radiates outwards in all directions, creating a starburst effect. The background is a solid, vibrant green, which makes the sparks stand out prominently.
